

## Tree Trimming Assessment Door Hanger:

Your tree trimming concerns have been assessed. It was determined there is no immediate threat to our power lines. No work will be done at present.

Your request involves vegetation near your service line (the line connected directly to your meter). Trimming around the service line is the responsibility of the customer. If you would like, you may call 1-800-ENTERGY to schedule a time for us to temporarily disconnect your service to allow you or your hired professional to make the necessary trimming.

The vegetation around the service or power line to your home was trimmed in order to safely restore and maintain service. Since this was not routine cycle trimming but rather the result of bad weather, winds, or falling tree branches, removing the resulting debris is the responsibility of the customer.

An Entergy Vegetation representative will assess your tree trimming concerns within 10 business days.
